## **COMPUTER ENGINEERING DEPARTMENT**

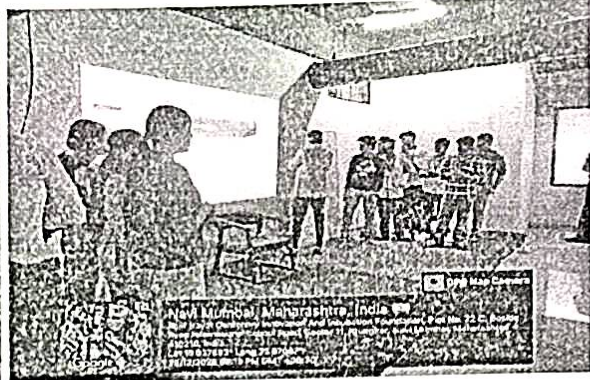

### **Report on Industrial Visit "Live Tech India"**

On 23rd December 2025, the Computer Department organized an industrial visit for Second Year Computer Engineering students to Live Tech India, Kharghar. The college provided bus facilities, and all students reached the location at 12:30 PM.

The visit began with a detailed presentation on Agile Methodology delivered by Mr. Prashant Kamble. He explained how Agile is used in real-world software projects and walked the students through the various stages of software development, such as requirement analysis, design, development, testing, deployment, and maintenance. Along with this, he shared valuable insights into the IT industry, including current trends, career opportunities, and the skills required to succeed in the field.

After the presentation, the students were given a guided tour of the company premises. This allowed them to observe the actual working environment, different departments, and how teams collaborate on projects in a professional setting. The visit concluded with an interactive question-and-answer session, where students actively participated and cleared their doubts about Agile practices, software development processes, and career paths in the IT industry.

The industrial visit was coordinated by Mrs. Monika Patil, with the support of Mrs. Sneha and Ms. Shafaque, under the guidance of HOD Ms. Komal Jadhav. The visit was informative and beneficial for the students.
